Currently in the UAE on a Visit Visa (valid until 04-01-2027) — immediately available to join

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience designing and delivering scalable SaaS and healthcare-tech web applications using React.js, Next.js, Node.js, TypeScript, Java, and PostgreSQL. Skilled in building responsive frontends, developing secure REST and TRPC APIs, and optimizing database performance with Drizzle ORM. Experience integrating third-party AI services (Azure AI Translation) and regulatory data standards (E2B XML, WHODrug) for compliance-driven platforms. Reduced API response times by 30%, cut redundant database queries by 25%, and boosted workflow efficiency by 40% across Agile, cross-functional teams. Seeking a Full Stack Developer / Frontend Developer / Backend Developer role in the UAE, with immediate availability.

SKILLS

Frontend: React.js, Next.js, TypeScript, Tailwind CSS, Chakra UI

Backend: Node.js, Java, Spring Boot, tRPC, REST APIs

Databases: PostgreSQL, MySQL, Drizzle ORM, Supabase

Cloud & Tools: Git, GitHub, Vercel, Postman, Stripe

AI / Data: Python, TensorFlow, OpenCV, Azure AI Translation API, CrewAI

WORK EXPERIENCE

Freelance Full Stack Developer | Clin Solution L.L.C (United States) — Remote

November 2025 – Present

- Built AeroReporting, an end-to-end Adverse Event Reporting System for a US healthcare-tech client, using React, TypeScript, tRPC, Node.js, PostgreSQL, and Supabase to capture, validate, and manage pharmacovigilance case data.
- Engineered a three-tier validation engine with MedDRA hierarchy mapping and Zod schema validation, achieving 100% compliance with E2B R3 safety-reporting standards.
- Built E2B-compliant XML and PDF report generation, enabling regulatory-ready adverse event submissions aligned with international pharmacovigilance data-exchange standards.
- Integrated Azure AI Translation API to power dynamic multilingual safety reporting across 137+ languages with Supabase caching, reducing manual localization effort for international regulatory submissions.
- Implemented WHODrug dictionary integration, standardizing pharmaceutical terminology across the reporting pipeline and improving data accuracy for regulatory teams.
- Delivered production-ready features across 3+ release cycles in direct collaboration with stakeholders, maintaining a fully responsive and accessible UI.

Full Stack Developer | Nexobe — Illinois, United States (Remote)

September 2024 – September 2025

- Designed and developed end-to-end web applications using React.js, Next.js, and Java-based backend services.
- Built type-safe TRPC and REST APIs, reducing API errors and improving stability by 30%.
- Optimized PostgreSQL schemas using Drizzle ORM, cutting redundant queries by 25% and improving scalability and data integrity.
- Developed and deployed interactive SaaS dashboards using Chakra UI and SaaS UI, boosting workflow efficiency by 40%.
- Developed reusable UI components adopted across multiple SaaS products, saving 20% development time.
- Delivered client SaaS products including Caviti AI (AI-powered dental SupplyOps platform) and the Otteri.ai product suite (Otteri.ai, PickeLai, Vipery.ai, Snap.photo, GoodOff).
- Collaborated with cross-functional teams in Agile sprints to deliver features ahead of deadlines.

Jr. Java Full Stack Developer Intern | Inmakes Infotech Pvt Ltd — Ernakulam, India
May 2024 – July 2024

- Developed full-stack modules using Java, Spring Boot, React, and MySQL/Hibernate, enhancing system performance and user experience.
- Contributed to building REST APIs, optimizing data flow and ensuring backend consistency.
- Gained practical experience with Agile workflows and collaborative development methodologies.

KEY PROJECTS

AeroReporting | Adverse Event Reporting System — Freelance, Clin Solution L.L.C

- Regulatory-compliant clinical safety platform with a three-tier validation engine, MedDRA hierarchy mapping, and dynamic translation across 137+ languages via Azure AI + Supabase caching.
- Achieved 100% E2B R3 compliance; delivered production-ready features across 3+ release cycles.

Caviti AI | AI-Powered Dental SupplyOps Platform — Client project via Nexobe

- Contributed to Caviti AI, an AI platform automating inventory tracking, demand prediction, and reordering for dental clinics, integrating with dental practice management software (PMS).
- Built scalable type-safe tRPC APIs, responsive React/Next.js dashboards, and optimized PostgreSQL schemas using Drizzle ORM, improving API stability by 30%.
- Integrated Stripe for subscription billing and order payments within the platform.
- Built AI-driven automated ordering using CrewAI multi-agent workflows to trigger dental supply reorders.

Otteri.ai Product Suite | AI Productivity Platform — Client projects via Nexobe

- Built reusable frontend components and integrated third-party AI APIs for Otteri.ai, an all-in-one AI productivity platform for content generation, automation, and creativity (writing, research, image generation), plus 4 related products (PickeLai, Vipery.ai, Snap.photo, GoodOff).
- Improved load times and standardized UI/UX across the product suite; fixed bugs and improved accessibility and overall performance.

Marine Debris Detection | Deep Learning — Final Year Project

- Built and evaluated multiple ML/DL models (CNN, Random Forest, hybrid CNN+Random Forest, CNN+UMAP) in Python/TensorFlow to classify marine debris in ocean imagery.
- Built an end-to-end pipeline: data splitting, image augmentation, model training, and evaluation (accuracy, F1, confusion matrix), plus Clarifai API integration and a Streamlit/Voila interactive classification app.

AI Virtual Mouse | Computer Vision / Human-Computer Interaction — College Mini Project

- Built a real-time, gesture-controlled virtual mouse in Python using MediaPipe's 21-point hand-landmark detection and OpenCV, with a reusable hand-tracking module.
- Implemented coordinate mapping (NumPy interpolation) and a smoothening algorithm for jitter-free cursor control, plus pinch-based click detection via PyAutoGUI.

EDUCATION

B.E. Computer Science and Engineering | Aalim Muhammed Salegh College of Engineering (Anna University)
2020 – 2024

CERTIFICATIONS

- Microsoft Certified: Azure AI Apps and Agents Developer Associate (Exam AI-103) — Microsoft (Oct 2026 – Oct 2027)
- AI Skills Fest 2026 — Microsoft (Credly)
- Data Science — Exposys Data Labs
- Introduction to Cloud Computing — IBM / TNSDC
- Cloud Core — IBM (Credly)
- JavaScript — GUVI
- Data-Driven Insights: Olympic Sports — IBM
